Work Experience

Team Black Box

Full-Stack Mobile Development Intern

Jan 2023 - June 2023 | Remote

Team Black Box was created to build amazing products (software and hardware), open-source code, and content. We call it "Building the Amaze".

- **Take-A-Sip**  – Worked on implementing custom sips using **react native** & **firebase**. Also integrated **markdown** files with react native for a change-log section in the app.
- **I-Won't-Forget**  – Employed natural language processing (**NLP**) techniques using **compromise.cool** to extract various parameters from reminder texts, resulting in a 30% improvement in reminder accuracy.
- **Land-Blocks** – Used **react-native-skia** library to construct a polygon with location coordinates.

Zu - Formerly Zupay

Flutter Development Intern

Oct 2021 - Jan 2022 | Remote

Zu is an investing cum learning app for teenagers with **100k+** downloads on Google Playstore.

 [ZuApp](#)

- Developed onboarding & dashboard pages using **flutter** & **firebase** and implemented **dark mode** to enhance user satisfaction for ZuApp.
- Leveraged **riverpod** for efficient state management, reducing app crashes, and utilized **dio** for seamless **API** requests.

Projects

Dtu Social

 [Link to App](#) | Jan 2023 - Present

A proximity chat app designed to connect college students, enabling easy conversations and collective growth in college.

- Used **flutter** & **firebase** for front-end & back-end respectively.
- **Geo-locator** package helps deliver the proximity chat functionality and **riverpod** packages provides seamless state management.

Personal Website - stormej.me

 [Link to Source Code](#) | Sept 2022 - Jan 23

- Developed using **flutter's web support** & considers responsiveness for desktop, mobile & tablet devices.
- Used **hashnode's api** to fetch and render **markdown** content.

Education

Bachelor's of Technology in Civil Engineering – Delhi Technological University (Formerly DCE)

GPA: 7.70 | 2025

Class XII – Delhi Public School, Dwarka (88.8% | 2020)
